

I am Jabulic Nene, when I came to Head ache Clinic, I had no hope of being the right and alive, I was just doing for the sake of living. The headache was terrible and it was 24 hours non-stop, using tablets all kinds and Grandpa only help for 10 min, after it started.

When they diagnosed me of migraine, I concluded my self as a dead person, cause I heard that so many people killed by headaches. I was total despair, I went back home thinking of funeral and the one who will take care of my children. For 2 week process at headache clinic encouraging and telling me not to take any tablets except Panadol. I said this people don't know what they are saying, "Panado" to my pain" they are joking, when they gave me their headache tool that I am using, I use it for, a week the headache was a history I didn't believe.

Today I am still alive because of this little thing that you can undermine, cause you want quick-fix for your pain. You know never lose hope till it's over, I never thought that little plastic with wires inside will help me so much.

People bear with this people they know what they are doing even if they don't feel your pain, but rest assure you will be 101 percent normal person.

Thanks

JABU. 20/9/2010
