The headache Clinic

Before coming to the Clinic, I was having a horrible headache, which I thought it will really kill me. I use to take different kinds of painkillers ~~they~~ ^{which} did not help. Went to different doctors but still the same.

I heard of the headache Clinic and did not waste any time. At the headache clinic I was received by warm hands. Staff members, nurses and everyone else in the clinic are guided by "BATHO PEKE" Principles. I was given medication to reduce my pains. Afterward I went through their processes, and furthermore given the miraculous PMA (plates) which really has done miracles in the real sense.

Thank you a million times the Headache Clinic, Doctors & Staff. I will recommend u to anyone with headache.
