

To The Headache Clinic

I've been suffering from migraines for the past 7yrs. Recently they had become seriously unbearable. My quality of life was hugely negatively impacted by the migraines. As a mother of a toddler, I couldn't actively participate in my child's active life as I was always feeling sick. My work was also negatively impacted as I had to take at least 2-3 days off – work every month.

From seeing how I was suffering my husband made an appointment at The Headache clinic, since migraine tablets made my migraines worse & caused me to be more ill. It's been a week now since I started using the PMA. I cannot believe the improvement it has caused. I haven't had not even 1 headache since then. I feel alive again! I can't even remember the last time I've felt this healthy. I feel is again!! I have more energy 4 all my daily activities. The quality of my life has dramatically improved. I cannot believe how clear my head feels. I can sit & study for 8hrs straight without being disrupted by an unbearable headache.

I can run around with my child for hours at hand without feeling sick. My husband also reaps the greatest rewards of my improved quality of life, in many ways!!

All this in 1 week! It's really too good 2 be true.

Thank you Headache clinic!!!
