

Dear Dr Shevel

I would like to thank you for changing my life to one which is now filled with sunshine, laughter and a long list of different food choices more special dairy products.

For the past 16 years I had to live with the painful headaches and always holding myself back, knowing that at any minute the pain would begin.

Because of you Dr Shevel, your staff and the surgery my friends have noticed the change in my life and are also very happy for me. I can't stop talking about the good treatment I'm getting from you and your staff, it can not be compared to any other hospitals I've been to.

I still get a few headaches, but they are nothing compared to before the operation and I am sure that they are just normal headaches which I can avoid by have less stressful conditions.

May Jehovah God bless you and your staff.

Thank you
Zandile Makwelo. (Port Elizabeth)
