

Dear Dr Shevel and Staff

This is just a note to say thank you very much for the cured headaches.

I visited the clinic on the 03<sup>rd</sup> April 2008, For the first two weeks I had terrible headaches and started to throw up at least twice in a day- I guess my body was reacting to the plate.

After two weeks, I never got any attacks. The quality of my life has improved tremendously. I can now drive long distances and even go to noisy places without getting any attacks. I can sit in meetings for the whole day(s) without any attacks. I can play with my kids just like any parent. Hey ...I can as well go the gym before I could not do any of the above . I got attacks daily with a stiff neck and permanent pains around my neck. I am now a different person and enjoy my life.

The past 10 years of horror are over and I believe that I am permanently cured. A very BIG THANK YOU to Dr Shevel and staff. God Bless!!!!

Regarding the safety of the plates- I am so scared to lose my plates since I am not allowed to eat wearing them- Any ideas on safekeeping??????? I cannot afford To lose my plates.

Thank you very much for your assistance.
