Good Day

Please could or would you kindly pass on this message to Doctor E. Shevel.

I would like to thank you once more for everything and to say that I have not had a single tablet for pain since Saturday, but better than that I have **Not** had a headache at all since then - I no longer experience that uncomfortable sort of pressure either. However I have the numbness on the left side of the head - I would confidently say for now (4 days after the OP) that the result of the operation is amazing.

A miracle? I don't think so just because you made me have no doubt but confident that I was in good hands. I felt Cared for and Understood. You are truly special and gifted!

I am pain free - I am extremely happy with the overall outcome.

I am sure and hope that many more in the same situation as I was get the opportunity to come your way.

Thank you Doctor for caring!

Mrs. T.Thorkildsen
