

## **HEADACHES, HEADACHES AND MORE HEADACHES!!**

**It all started in 2004, couldn't eat or drink cold stuff and endless sleep. Went to different doctors and dentists and all I got was injections from east rand to west rand, public and private doctors, nobody knew what's the cause. I was referred to the Headache Clinic, can't remember by whom because of the pain. No injections, no drugs until 2009 I suffer no headaches. 100% improvement and I am happy to have come here. You've got a terrible headache? You've come to the right place.**
